

Position Description

SR Dev-Ops Engineer

Primary Objective	<p>Optii is a rapidly growing provider of housekeeping software solutions to the hospitality industry. Our suite of products increases profit and improves the customer experience in hotels across Asia-Pacific, US, Europe and the Middle East.</p> <p>Launching the first site in 2008, Optii is the founder of the niche and market leader with clients such as IHG, Las Vegas Sands, Radisson, Shangri-La and more.</p> <p>We are seeking a full-time Sr Dev-Ops engineer to join our team. This role demands an innovative and motivated leader who can deliver microservice based features for our market leading product. This role will lead the technical team in an Agile environment to efficiently deploy our solutions to our various clients.</p>
Reports to	Snr Director Technology
Location	Austin, TX
Current	April 2019

The HelpDesk Technician is responsible and accountable for:

1. Creating and modifying infrastructure code to deploy into cloud environments
2. Identifying and implementing tools to improve existing environments (CI/CD, monitoring, logging)
3. Working with the developers and support their infrastructure needs.
4. Creating an appropriate level of documentation for implementations such that other team members can easily understand what was built or needs to be built
5. Designing, developing, recommending and getting buy-in for coding standards and best practices to follow for any given project
6. Monitoring systems health and security. Ensure SLAs are met or exceeded
7. Configuring and implementing build reporting based on plug-ins and tools
8. Protecting the stability of the infrastructure through consistency of builds and processes
9. Enhancing /extending a configuration/deployment/monitoring framework

Person Profile
